

IMPAIRED DRIVING PREVENTION

Accomplishments	
Problem Identification <ul style="list-style-type: none"> Based on the data, most DUI offenses are committed by first-time offenders. Based on the data, many impaired driving crashes involve the use of substances other than alcohol. 	Strategy 1 Strategy 2 Strategy 3 Strategy 4
Strategy 2: Improve the field assessment, data collection, and analysis of drug-impaired driving <i>Thirty-five Nevada law enforcement officers experienced the first “Marijuana Green Lab” training where officers observed the signs and symptoms of marijuana impairment.</i>	Strategy 2
<i>OTS is seeking recommendations from toxicology lab representatives on impaired driving and crime lab services, as well as input on an upcoming NHTSA assessment.</i>	Strategy 2
Priorities/Actions	
Determine New Strategies and Action Steps <i>Task Force to assess existing strategies and action steps to close out 2020 and determine new strategies and action steps for 2021-2025 Update.</i>	
Legislative Support <i>Support ARIDE training for all officers and a DRE call-out program for further legislative action.</i>	
Advisory Opinions	
Under Development
